

AMENDMENTS TO THE CLAIMS:

Kindly amend claim 5 and add new claims 9-12, as shown below. This listing of claims will replace all prior versions and listings of claims in the Application:

Claims 1-4 (canceled)

Claim 5 (currently amended): A plug-in connector module with a shielding against interfering radiation, for use in a module mounting device of a plug-in connector casing, wherein said plug-in connector module comprises:

an electrically conductive shell-type casing, with a connector insert; ~~is retained in~~
a retaining body composed of insulating material[[;]], the retaining body, with the shell-type casing and the connector insert, [[are]] being adapted to be locked in place in the module mounting device; [[and]]
~~there is provided on the shell-type casing~~ a clip provided on the shell-type casing so that by
~~means of which~~ a signal line, leading to the connector insert, may be fastened, [[the]] and a
shielding braid of the signal line contacting ~~being contacted to~~ the shell-type casing.

Claim 6 (previously presented): The plug-in connector module according to claim 5, wherein the shell-type casing is adapted to be locked together with the retaining body.

Claim 7 (previously presented): The plug-in connector module according to claim 5, wherein the connector insert is adapted to be fastened in the shell-type casing.

Claim 8 (previously presented): The plug-in connector module according to claim 5, wherein the clip is adapted to be fastened to an elongated side surface of the shell-type casing.

Claim 9 (new): A plug-in connector module with a shielding against interfering radiation, for use in a module mounting device of a plug-in connector casing, wherein said plug-in connector module comprises:

an electrically conductive shell-type casing, with a connector insert;

a retaining body composed of insulating material, the retaining body, with the shell-type casing and the connector insert, being locked in place in the module mounting device;

a clip provided on the shell-type casing for fixing a shielding braid of the signal line in contact with the shell-type casing.

Claim 10 (new): The plug-in connector module according to claim 9, wherein the shell-type casing is locked together with the retaining body.

Claim 11(new): The plug-in connector module according to claim 9, wherein the connector insert is fastened in the shell-type casing.

Claim 12 (new): The plug-in connector module according to claim 9, wherein the clip is fastened to an elongated side surface of the shell-type casing.
